

## Week 27

This week we get the last and most complex Skåne lace. It is a combination of the Hjärtan i Klunga (heart in a square) and the Bladstjärna i Klunga (leaf-star in a square). On both edges the Gamla Sotrynet (old pignose) is made. This way you can use it as a bookmark or as an application. Should you like to use it as an edging, you have remove the pignose on one side. Do you want to make an insertion, remove the pignose on both sides. This make the Skåne so special. You can make combinations of various elements, so also leave them out. There are several motifs which can be put into a square and this combined with each other into an insertion or edging. For this lace you need 25 pairs of bobbins with linen 80/2 or similar. I recommend you for this width to use the pattern to make the lace on. This makes it more easy to get it in the correct shape.

Because the size the diagramm is on the next page. Have fun with this lace. Next week the lace will be a little bit more simple.
