

## Week 38

This is another start of a series Torchon laces. The first is designed by Bep Hoogerbrugge. I made the ground as whole stitch, pin whole stitch and the rectangles in cloth stitch. Of course you are free to choose otherwise. You need 24 pairs of bobbins with Ritter silk 100/3 or similar and 1 pair with a gimp.

The gimps cross each other at the places where the rectangles touch each other. There the rectangles should be finished, the gimp brought upwards to the other rectangle before the ground can be made.

Have fun this week.
