

Week 42

the torchon edging is again my design. It is an edging with a little waving edge and a flower in the centre. You need 28 pairs of bobbins with DMC fil à dentelle 80 and 1 pair with a gimp i.e. cotton perlé 5.

The gimp goes around the 'leaves'. At the deepest point it goes as a stem towards the flower. If you don't twist the pairs of the ground between the gimp going to and coming from the flower, the gimp will stay together in the stem. In the centre of the flower a $8 \frac{1}{2}$ pairs crossing is made. Lay first the pairs of the tallies starting from right around the pin, then weave the gimp through the pairs as in the drawing below, replace the pin and finish the crossing.

The diagram:
