

Insertion with stars

Necessary: 42 pairs of bobbins with DMC 80 or Aurifil 28 (grey cone)

A rather wide insertion in Torchon lace. I made it in 3 colors. That is why the diagram is also in 3 colors. These colors indicate the path of the colored pairs, not the used stitches. When you don't want to work with colors, it is also very good to make in one color. The design is based on a piece of machine-made filetlace I found in my stock. It is a rather free interpretation of it.

Enjoy working the lace.
